REDEFINE YOUR LIMITS

Extremities® have been designing and manufacturing high-quality clothing accessories since the 1980's. Using tried and tested materials, **Extremities®** products perform in some of the most extreme conditions, keeping you protected in every possible environment. For over 35 years our gloves, hats, gaiters and socks have evolved to provide a wider selection of styles suitable for anyone venturing outdoors. **Extremities®** clothing accessories have been put to the test by explorers and record breaking outdoor athletes, who have taken them to the ends of the earth and in some of the most extreme places on the planet.

We are an accessories specialist focusing purely on gloves, hats, gaiters and socks. We pride ourselves on our technical understanding of fabrics and materials and how they work best in clothing accessories. We invest in stock enabling us to fulfil in-season orders in addition to pre-orders, with many styles available all year round. Sell through in store is supported with a comprehensive range of POS. We are committed to the quality of the products we develop and the service we provide.

For whatever the day brings, Extremities is there. From climbing cliff edges, running the most grueling trail or training for the Olympics, we've got it covered. All **Extremities®** products have been tried and tested in real environments that put them through their paces, to help you to redefine your limits.

PrimaLoft® Gold Insulation is the go-to choice for adventurers looking for protection in extreme conditions.

Microfibers trap body heat to make this the most thermally-efficient synthetic insulation available, with water-repellency that insulates even in the wettest weather – maintaining 98% of warmth when wet.

Different weights of PrimaLoft® Gold Insulation explained

We use different weights of PrimaLoft® Gold Insulation depending on the conditions the products are designed for:

- 3oz:** The lightest and most flexible insulation we use, for maximum dexterity
- 5oz:** A standard single layer insulation, suitable for most conditions
- 6oz:** A double layer of 3oz insulation
- 10oz:** A double layer of 5oz insulation for severe conditions
- 13oz:** A triple layer of insulation, for protection in the most extreme conditions

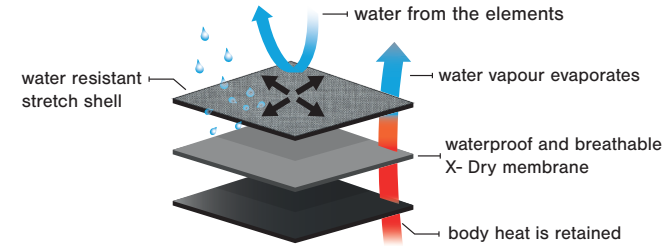

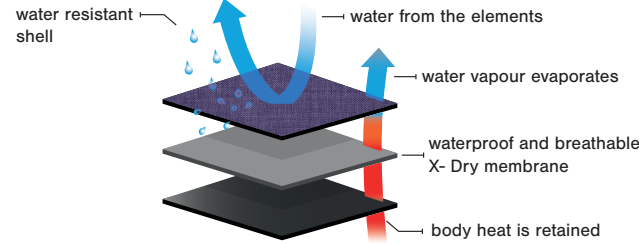

Reflective prints and yarns provide an added safety feature in the dark or low light conditions. The reflective effect is achieved through the use of micro glass beads which collect light, focus it and bounce it back to the light source.

The reflective element lights up for the person with the light source or who is in line with it. The quality of the reflective elements is specified to achieve the required level of visibility and products are designed to provide 360° reflection where feasible.

- Repreve® is a fibre made from recycled plastic bottles and post-industrial waste
- Available in Repreve® polyester and Repreve® nylon
- Made from 100% recycled materials

Wool Properties

Thermoregulating –
Breathable. Wool can absorb or release moisture keeping the wearer warm or cool

Natural Elasticity –
Fibres can stretch and return to its shape without wrinkling and sagging

Durable & Hard Wearing –
resists abrasion and tearing

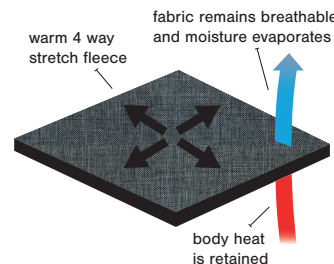

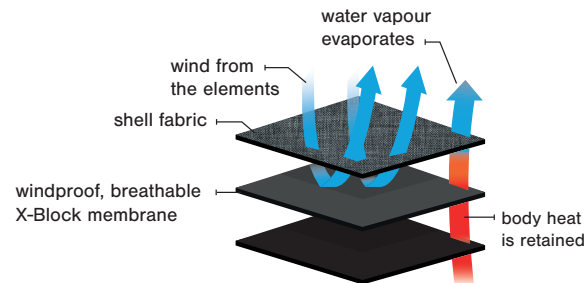

Mould, Mildew, Stain & Odour Resistant

Natural UV Protection

Merino Wool

Merino Wool has good thermal, wicking and antibacterial properties. It absorbs up to a third of its weight in water but still retains warmth when wet. Merino Wool is one of the finest wools making it suitable for people with more sensitive skin, fibres with a thickness of only 20 microns are used in extremities® products.

Ultra Liner Fleece

Ultra liner fabric is a lightweight, packable grid fleece which provides a high warmth to weight ratio. A great layering fabric when cold and ideal for high energy activities. The grid construction means air flows more easily through the channels, providing good breathability while the squares trap warmth.

Power Liner

Power Liner provides a high quality knit, great thermal properties and outstanding moisture management characteristics. Its high stretch, close fitting performance is combined with a soft fleecy back for maximum comfort. A great value option for gloves, hats and neck tubes.

GORE-TEX GLOVES GORE ACTIVE TECHNOLOGY

DRIER. LONGER.
WATERPROOF AND BREATHABLE.

TECHNICAL FEATURES

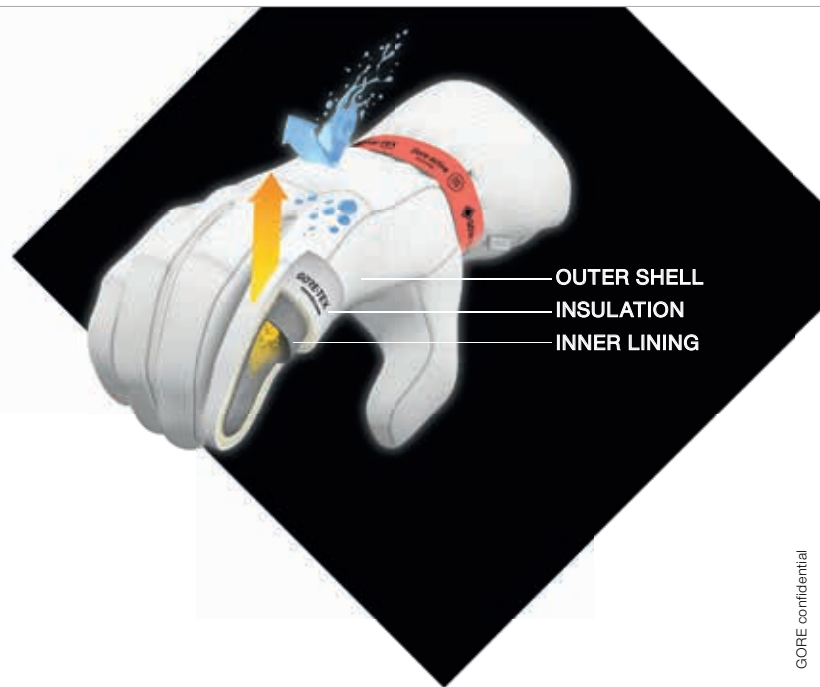

- ▶ Durable waterproof, windproof and highly breathable.
- ▶ The whole system of inner lining, membrane and outer material is optimized for enhanced breathability and extremely breathable.

CONSUMER BENEFITS

- ▶ Reliable protection against rain, snow and wind.
- ▶ Even during heavy exercise sweat can easily escape from the inside.
- ▶ Enduring weather protection and comfort, balanced heat transfer and optimum moisture management.
